Trigunaji was believed to be one of those Physicians who have the ability to gain insight into the patient’s medical history after a few seconds of contact with the wrist pulse of the patient (5), (6). As said by Vd. Trigunaji he had not gained this skill through his family, but, unusually, he developed it in times of great demand. He said once that he would read the pulses of 10,000 people in a day during epidemics. There used to be big queues of patients waiting for hours together to consult Vd. Trigunaji day after day(7). Vd. Trigunaji devoted his entire lifetime for treating people of society rich and poor, who visited for his advice. His skill in Nadi vigyan is always an inspiration for all. The world famous Trigunaji used to attend on an average 300 patients daily. Vd. Trigunaji’s consultation was free of cost till his last breath(8).

As head of medical specialists team Vd. Trigunaji contributed his professional skills in 1979 in the ‘Encephalitis’ affected areas of Uttar Pradesh, Bihar and West Bengal. This team established camp hospitals in these states and successfully treated a good number of serious patients. The Central and State Governments acknowledged the services of Vd. Trigunaji1.

Ultimately his able son Padmabhushan Devenra Triguna, when become the member of the Executive Council of Banaras Hindu University, played decisive role to restart the BAMS course in BHU, which had remain suspended for 40 years because of prejudice.
